PULL

AND *bright!*

Cut

color black

color red

Cut

to make Merry and Bright Appreciation Card:

1. Print out the "May Your Days Be Merry" and "& Bright" pages, 1 copy of each per project.
2. Begin by coloring in the "& Bright" page. The center rectangle should be colored in black. The bottom rectangle should be colored in red. The top rectangle can be colored in if desired; it also is a great place to write a short note or tape in a gift card!
3. Once coloring the "& Bright" page is completed, cut along the dotted lines to remove excess paper. Set aside.
4. Next cut out the "May Your Days Be Merry" page. This includes the small "pull tab" opening along the top of the deer's head, and also the nose. To cut out the nose, fold the paper in half the long way and follow the half circle lines. This will make the nose symmetrical. Once cutting is completed, fold back open and lay flat.
5. Now fold "May Your Days Be Merry" page into thirds using the horizontal "fold" lines running the width of the paper.
6. Add glue to the gray "glue" stripe, overlap folded edges, and press to fasten shut into an envelope. Slide the "& Bright" page into the opening so that nose appears black and the "pull" tap is in view at the top.
7. Trace the project creator's hands onto brown construction paper and glue to the envelope back. Give to someone special to make their day extra bright!
